

On Saturday, September 15, 2012, the Meredith Energy Committee is hosting a Green Home Building Tour. Three Meredith homes that are completely “off the grid” will be showcased. This is an opportunity to take an up-close look at alternative energy systems and energy efficient building materials and finishings. Transportation will be provided and pre-registration is required.

The Meredith Energy Committee was formed in 2010 with the goal of promoting and encouraging energy conservation measures to Meredith’s residents, businesses and municipal operations. The public can find out more about the Meredith Energy Committee by visiting the Town of Meredith website at <http://meredithnh.org>
