

BUTTON UP 201 Workshop – January 26, 2013

<http://myenergyplan.net/>

My Energy Plan Whether you're just getting started or have made a lot of energy improvements already and are ready for renewable energy, our tools can help your household reduce your energy consumption and environmental impact. And save money in the process!

http://meredithenergy.org/index.php?title=Meredith_Energy_Portal

Meredith Energy Handbook The handbook provides Meredith residents with an introduction on how to help mitigate climate change within their community. Included in the handbook is several "tear-outs" that provide an excellent background on various renewable energy technologies, addresses frequently asked questions and common misconceptions as well as providing links to credible resources for further investigation.

Energy Efficiency Programs NHEC is providing incentives and services to help residential and commercial members invest in energy efficiency improvements. There are highlights of the programs, including links to program pages that contain further information and/or application forms. <http://www.nhsaves.com/homeheating/> is a link to the Home Heating Index, an online tool to see if your home is eligible for an audit and potential incentives up to 50% or \$4,000 of the recommended efficiency measures. More information is also available by calling Member Solutions at 1-800-698-2007. Please be advised that rebates and program enrollment are available on a first-come first served basis.
