

WAUKEWAN PESTICIDE FREE ZONE

And Did You Know That:

- NH Rule 502.05(a) protects public water supplies by requiring a special permit to apply pesticides anywhere within 250 feet of the Waukewan Watershed surface waters (see red zone on back map).
- This law applies to both professional applicators as well as landowners!

Did You Know?

- Lake Waukewan is the sole public drinking supply for the Town of Meredith
- Pesticides applied to lawns and gardens contaminate local streams, ponds and lakes
- Runoff from cosmetic lawn pesticides contaminates local watersheds and stresses municipal water treatment
- Toxic Pesticides cannot be filtered or treated from public drinking water and private wells
- Children exposed to herbicides during the first five years of life are 4 1/2 times more likely to be diagnosed with asthma before the age of five.

Avoid toxic chemicals and seek out natural lawn care solutions!

Maintain a Healthy Family Environment . . .

Keep your lawn and lake off drugs . . .

And remember not to "P" in the Lake!
